# SPECIALIST TRAINING FOR LARGE YACHT HELICOPTER OPERATIONS

---

We are proud to offer a suite of industry-recognised Large Yacht Heliport Safety Training courses, essential for superyachts with active shipboard heliports.

Delivered by Maritime Aviation, a global leader in helicopter safety training, these courses are tailored to meet the operational demands of aviation-capable yachts and are available worldwide.

Training packages are fully bespoke and can be delivered:

- Onboard your vessel, anywhere in the world
- At a suitable location ashore
- At Maritime Aviation's training facilities in the UK, the Netherlands, Germany, or the South of France

## **COURSE MODULES**

---

### **HELIPORT PROCEDURES & EMERGENCY RESPONSE**

Train to become an effective Heliport Deck Assistant (HDA) and Heliport Rescue Firefighter (HRF). Learn how to prepare for flying operations, assist with guest transfers, and respond to onboard helicopter emergencies.

Includes:

- SOPs & EOPs for heliport operations
- Helicopter hazard awareness
- Medevac procedures
- Practical deck operations

### **HELIPORT RESCUE & FIREFIGHTING**

Gain vital experience in shipboard heliport firefighting. Learn to manage fire hazards, operate firefighting equipment, and conduct passenger evacuation and extraction during emergencies.

Includes:

- Firefighting techniques for various helicopter fire types
- Use of PPE and firefighting media
- Helicopter accident emergency response scenarios
- Post-fire procedures

## HELICOPTER LANDING OFFICER (HLO)

Develop leadership and coordination skills for managing heliport operations. This module focuses on the HLO's role in safety, communication, and emergency response.

Includes:

- Pre-arrival and departure SOPs
- Guest and cargo transfer coordination
- Emergency response incident management
- Post-incident reporting

## HELICOPTER REFUELLING

Understand the procedures and safety measures for refuelling helicopters at sea. Learn about aviation fuel systems, contamination risks, and spill response.

Includes:

- Aviation fuel types and handling
- Refuelling system components
- Fuel sampling and quality control
- Spill response protocols

## CERTIFICATION

---

Successful delegates will receive Maritime Aviation certificates valid for 2 years.
