

# SAFETY TRAINING & EMERGENCY PROCEDURES

## S.T.E.P

---

Safety Training and Emergency Procedures (STEP) is a programme, designed by training experts Dark Blu Inc, that covers a multitude of emergency safety training, including fire safety, crisis management and security.

The programmes are made bespoke to each vessel or crew and are designed to enhance and develop your knowledge and skills within your field.

The instructors will use all elements of dealing with onboard incidents that may or may not involve guests.

The course will put you in various environments and situations to help develop skills for every location of your vessel.

## LITHIUM-ION AWARENESS

---

- Awareness on lithium powered equipment and items on board
- Recognizing the dangers lithium-ion poses
- Awareness of personal equipment
- What can be done to help prevent lithium fires?
- Practical drills on how to deal with the situation

## ESCAPE ROUTES AND ABANDON SHIP

---

- Reaction to alarms - Survival drills before leaving cabin
- Method/direction of exiting space
- Working as a team to exit

## IMPLEMENTING A DRUG POLICY

---

- Discussion of why not and why you should
- Understanding the test
- Awareness lectures for crew
- The test itself, look back over six to Nine months - Ability to find what, when and how the drug was consumed.
- A developmental approach to drugs in a modern society

# additional information

There is no testing required at the end of these courses, as it is designed as a training module to enhance your skillset as well as your knowledge.

The courses are tailored to suit the requirements of the crew/vessel. As such, the duration of the training can vary between anything from a day to a full 4-week course to cover the entire syllabus.

The team will attend to wherever they are required and, due to the variety of subjects available, are chosen based on the skill set desired.

The team are also equipped to carry out drug testing specifically for yachts. They have a state-of-the-art, government approved lab for testing hair samples to do so.

Prices for this course depends upon the package required, so are available upon application.
