

Working with Kilo Solutions Ltd, and in partnership with Whitehorse Maritime Academy, we are pleased to bring you a state-of-the-art Virtual Reality bridge training experience. Each immersive VR experience is tailored to your essential training needs.

The Virtual Reality bridge simulator allows users to engage in an infinite number of realistic scenarios from anywhere in the world. It can be used to bring in multiple participants to one bridge, regardless of their location, to form a complete bridge team for real-time collaboration.

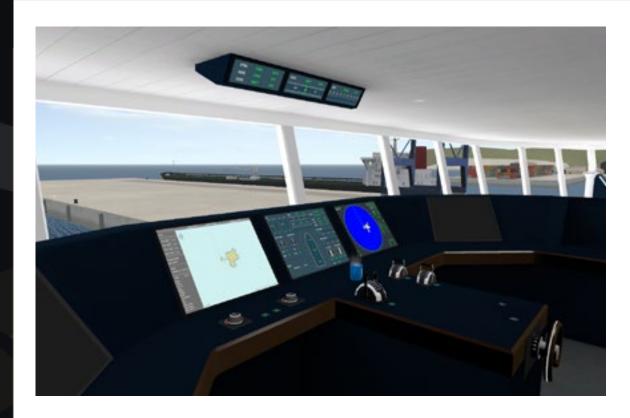

VASCO (Virtual Advancement System for Competent Operations) is Kilo's revolutionary VR maritime simulator program, transforming the way seafarers and bridge crew are trained.

It is a fully immersive, portable bridge simulator that allows mariners to connect, either individually or as a team, on an interactive bridge complete with a full suite of navigational equipment. The team can comprise of seafarers from anywhere in the world to form a coherent bridge crew in a real-time, virtual environment.

Putting the crew members at the heart of a fully interactive, authentic feeling navigational bridge offers a more in-depth training solution. It allows individuals to continue to develop and maintain their skills in areas such as COLREGs, Bridge Resource Management and General Bridge Operations.

The VASCO platform helps to avoid skill-fade, even after extended periods of time ashore and is designed to accommodate all levels of capability, from Entry level Ratings to Senior Captains. Each bridge can accommodate up to 5 learners at once with as many authorised observers as necessary. Users can choose from pre-loaded scenarios or those developed specifically to meet their own training requirements.

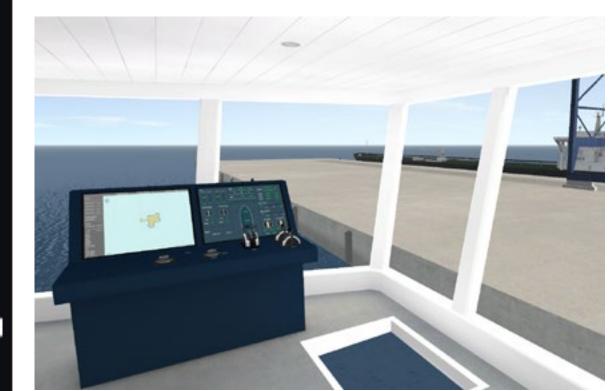

SCALABLE

Flexible to your training requirements, large or small.

REALISTIC

Designed and developed by maritime experts for technical accuracy.

INTUITIVE

Easy to use, regardless of digital competence.

PORTABLE

Accessible from anywhere, anytime using a minimum 3G connection.

ADAPTABLE

Set your locations and challenges to specify your training scenarios.

YOUR VR SESSION

PURCHASE OR USE YOUR OWN META QUEST 2 OR 3 EQUIPMENT OR

RENT THEM FROM DSNM (POA)*

1 - BRIEFING TO START THE SESSION

2 - 45 MINUTE SESSION
